RE: Docket #98N-1038

I am writing to demand that the requirement for labeling irradiated food be continued – and without using euphemisms such as "electronic pasteurization" or "cold pasteurization".

The desires of the National Food Processors Association, the meat processing industry, fast food corporations and supermarket chains must not be allowed to dictate decisions that effect the very basis of life – our food supply. The destruction of food value, the increased medical risks, and the environmental hazards inherent in nuclear radiation facilities demand that labeling enable consumers to make informed decisions.

Sincerely,

Jody Grage Haug  
Voter – and Eater
